The MC51 case includes a control HUB with a RF remote control with 40 different lighting modes and an Addressable RGB connector for motherboard light control.

Follow this sheet to enjoy all its features.

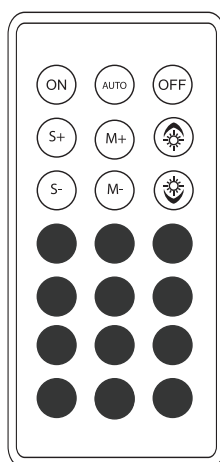

#### RF REMOTE CONTROL SYSTEM

Choose between 40 default lighting modes thanks to a quick and easy controller

#### ADDRESSABLE RGB MOTHERBOARD CONTROL

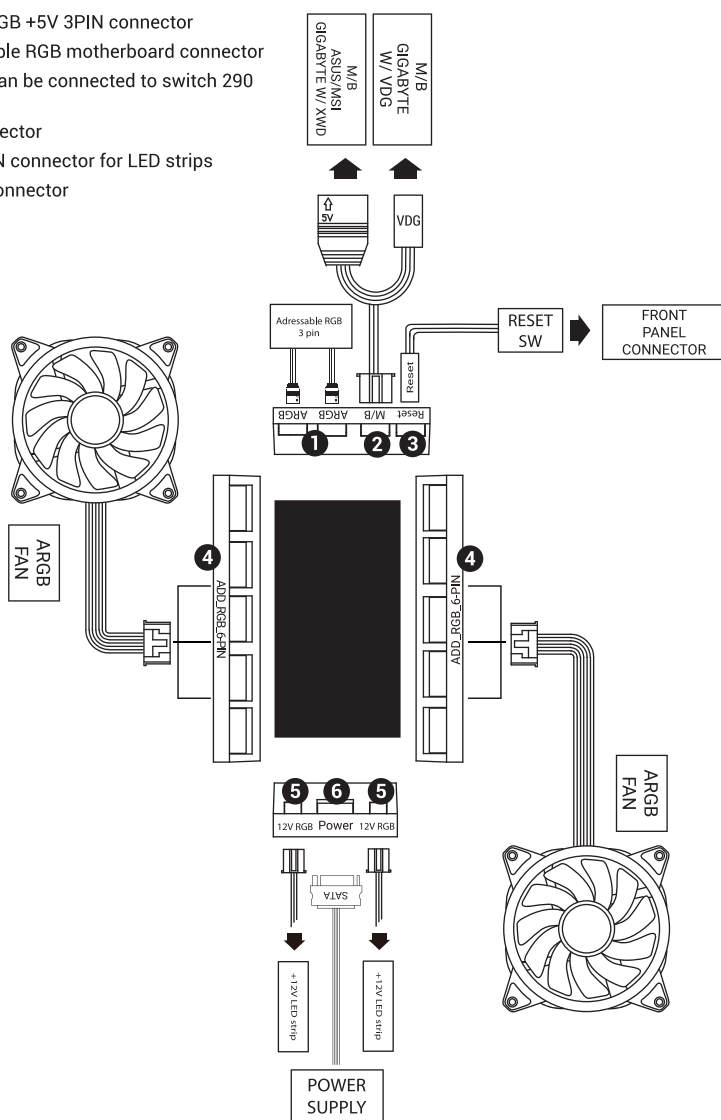

1. Connect the Addressable RGB connector to the motherboard ARGB plug.
2. Tap ON button of the remote control to switch the HUB to ARGB motherboard control. (NOTE: The controller won't work in this mode)
3. Press again ON if you want to switch back to preset HUB 40 lighting modes.

Note to user: Check for ARGB compatibilities on your motherboard's user manual.

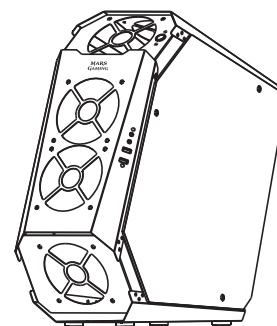

- S+ S- : Increase/Decrease the speed of the fans
- M+ M- : Next/Previous lighting mode
- (Sun icon) (Moon icon) : Increase/Decrease lighting brightness
- (Color circle) : Predefined colors
- ON : Switch between Remote Control mode and Motherboard Control mode
- AUTO : Lighting effect automatic change

- 1 Addressable RGB +5V 3PIN connector
- 2 M/B Addressable RGB motherboard connector
- 3 Reset button can be connected to switch 290 light modes
- 4 6 PIN fan connector
- 5 RGB +12V 4PIN connector for LED strips
- 6 Power SATA connector
